

INNOVATION FUND – SME CALL WEBINAR

Description:

The [Innovation Fund](#) is one of the world's largest funding programmes for the deployment of innovative net-zero and low-carbon technologies. The Commission is planning a new funding call designed specifically for small and medium-sized enterprises (SMEs) with smaller projects. The aim is simple: make it easier for SMEs to apply for Innovation funding, without needing previous experience with EU grant applications. The call will support SMEs running "small-scale projects" with capital expenditures between €2.5 million and €20 million. SMEs are defined according to the EU definition based on staff numbers and turnover (Recommendation 2003/361).

The total budget is planned to be €200 million.

See more info here: [IF26 SME Call - Climate Action - European Commission](#)

Participation to the webinar is free of charge, registration is mandatory. You can **register until 12 October at 5pm CET**. Registered participants will receive the Webex connection details ahead of the event.
